it took 2 months before i noticed that it is not growing, and it started getting smaller at month 3, and smaller and smaller as each week went by

 decided to risk everything so they could tax spend and redistribute wealth

 in the yard i use a barn yard spray called permetherin, i found it at tractor supply farm store

 it makes you mad because at the end of the day for a government subsidized health service patients demanding more money and time than others for no legitimate reason is hurting other patients
